

CUMULATED BRIEF SUBJECT INDEX

This issue contains a 3-month cumulation of the Brief Subject Index. Subject terms are taken from the *Thesaurus of Psychological Index Terms*. Only those terms representing subject matter appearing in the last 3 issues are listed. See references are used to refer to preferred forms of entry, or from conceptually broader terms that have had no postings in the last 3 months to narrower terms. See Also references alert the reader to more specific terms. Documents are indexed with the most specific terms that are appropriate for the document's content. Subject terms representing the main concepts within a document are called major terms and are printed. Subject terms representing information of secondary importance to a given document are called minor terms and are not printed, but they are searchable by computer. Depending on the context of the document, any term from the Thesaurus may be assigned as major or minor. Up to ten major terms may be printed per document.

CUMULATED AUTHOR INDEX

This issue contains a 3-month cumulation of the Author Index. The Author Index is intended to be a name only and not a person index. "Adams, P." will be listed separately from "Adams, Paul" even though the names may refer to the same person; however, two listings for "Adams, P." may refer to two different authors. As many as four authors are listed; if there are more than four, the first author is listed followed by "et al."

CUMULATED BRIEF SUBJECT INDEX

This issue contains a 3-month cumulation of the Brief Subject Index. Subject terms are taken from the *Thesaurus of Psychological Index Terms*. Only those terms representing subject matter appearing in the last 3 issues are listed. See references are used to refer to preferred forms of entry, or from conceptually broader terms that have had no postings in the last 3 months to narrower terms. See Also references alert the reader to more specific terms. Documents are indexed with the most specific terms that are appropriate for the document's content. Subject terms representing the main concepts within a document are called major terms and are printed. Subject terms representing information of secondary importance to a given document are called minor terms and are not printed, but they are searchable by computer. Depending on the context of the document, any term from the Thesaurus may be assigned as major or minor. Up to ten major terms may be printed per document.

CUMULATED AUTHOR INDEX

This issue contains a 3-month cumulation of the Author Index. The Author Index is intended to be a name only and not a person index. "Adams, P." will be listed separately from "Adams, Paul" even though the names may refer to the same person; however, two listings for "Adams, P." may refer to two different authors. As many as four authors are listed; if there are more than four, the first author is listed followed by "et al."
